INTRODUCING TTB SMART FORM 5120.17sm, REPORT OF WINE PREMISES OPERATIONS

We are pleased to announce the release of a “smart” version of TTB Form [5120.17sm, Report of Wine Premises Operations](#), the wine industry’s most frequently downloaded form. You are welcome to use this smart version for the next submission of your winery operations report.

Smart features mean fewer errors!

Smart forms include built-in logic and automation features that simplify form completion, reduce errors, and teach users how to complete the form correctly.

The smart version of the winery operations report:

- Performs most mathematical computations
- Recognizes certain common errors and attempts to prevent you from making those errors
- Requires you to complete all mandatory fields
- Checks for errors in most fields; when errors are recognized, a popup window provides instructions for corrections.

Please review the [Smart Form User Guide](#) before using the smart form. After reviewing the [guide](#), if you still have comments or concerns about the form, please send them to FormComments@ttb.gov. We will consider all comments and make adjustments to the smart form as necessary.
